SIMUL BISTA

+1 (647)-509-4502 | simulbista@gmail.com | Toronto, ON | **LinkedIn**: simul-bista | **GitHub**: simulbista | **Portfolio**

TECHNICAL SKILLS

- **Languages**: JAVA, JavaScript, TypeScript, SQL, HTML, CSS
- **Libraries & Frameworks**: Spring Boot, Spring MVC, Spring JPA, Spring Security, NodeJS, ExpressJS, ReactJS, AngularJS
- **Others**: MongoDB, MySQL, PostgreSQL, Oracle PL/SQL, Linux, Docker, Junit, REST API, AWS, GIT, Swagger

EDUCATION

- **PG Certificate, IT Solutions (Dean's Honors),** *Humber College, Toronto ON* Jan 2022 - Aug 2023
  Relevant Coursework - *DB Programming using JAVA, Data Structures & Design Patterns, J2EE Web & Business Components, Enterprise Application Modeling, Web Programming Framework.*
- **BSc. in Computer Science and Information Tech.,** *St. Xavier's College, Nepal* Oct 2011 - Dec 2015

PROFESSIONAL EXPERIENCE

Team Lead and Full Stack Developer May 2023 - Aug 2023

Holland Bloorview Kids Rehab – Bloorview Research Institute, Toronto, ON

- Led a team of **3 developers** to design a **service oriented, responsive** web application for patient progress tracking, achieving a **70% reduction** in administrative workload through **automation** and streamlined data submission and report generation.
- Implemented **MVC architecture** and JWT authentication using **context API**, storing JWT tokens in browser local storage, enabling **clinician-specific patient record management** and incorporating the **record archive feature**.
- Tech stack: **MongoDB, ExpressJS, ReactJS, NodeJS, and JWT**

Professor – Web Application Development and Adaptive Web Design Jan 2024 - Present

Humber College & Seneca Polytechnic, Toronto, ON

- Instructed students across multiple semesters in various aspects of web application development and adaptive design.
- Developed and instructed courses on **N-tier enterprise application development**, covering **Spring Boot**, RESTful services, Microservices, **SOLID principles**, **TDD** approach, Spring JPA, JDBC integration, Spring Security, HTML5, CSS, and JavaScript.

Research Associate Jul 2023 – Present

Sir Sandford Fleming College, Toronto, ON

- Developed a web application using **ReactJS** and **Firebase**, interfacing with **generative AI model** APIs to modify images based on user prompts.
- Conducted extensive research on a wide array of innovative tools and technologies, strategically assembling a robust toolkit to bring the proof-of-concept project to life.

Team Lead - Innovation and IT Oct 2018 - Jan 2022

World Vision International

- Led the design and scaling of **3 impactful digital solutions**: a blockchain-based digital transaction platform, an interactive gamified mobile application, and an educational online marketplace built using technologies like **Django, ReactJS, Flutter, Spring Boot, PHP (Code Igniter)**.
- Engaged global teams and partners to collectively impact over **150,000 individuals**, resulting in disaster risk reduction, enhanced crisis cash programs, and improved community book access.

PROJECTS

- Finance Management App **- Budget Buddy (**JAVA**, Spring Boot,** Spring Security**, ReactJS, MongoDB, Swagger)**
  - Led a team of **2 developers** to develop a full-stack web application for personal finance management, including expense and income tracking, group finance collaboration, and user authentication; utilized **TDD** Approach with **Junit** and **Mockito** for unit testing, while adhering to **SOLID** principles for robust code architecture and maintainability.
  - Implemented over **25 REST APIs** to facilitate seamless interaction with MongoDB, enabling efficient data retrieval, manipulation, and rendering in the ReactJS-based front-end.
- E-commerce platform – **Petal Express** (ReactJS, AngularJS, NodeJS, ExpressJS, MongoDB, **JWT**)
  - Spearheaded the development of **an e-commerce platform** for flower delivery, leading a team to implement authentication, product information, order management, and cart functionality using **MVC architecture**.
  - Orchestrated the integration of two frontends – one in **ReactJS** and the other in **AngularJS** – communicating with a unified backend in **ExpressJS** and **NodeJS,** incorporating **CI/CD** pipelines on **Vercel**.
